

**Exercise 1:**

Create an HTML file (e.g. first\_page.html) that specifies a page that contains a heading and two paragraphs of text. Use the HTML tags <h1> and <p> in this exercise.

Use any text you like for the heading and paragraph.

**Exercise 2:**

Add an unordered list to your first web page.

Create a basic shopping list if you like

**Exercise 3:**

Add an image to your web page.

Find a image from a Google Images or use one you may already have access to

**Exercise 4:**

Create another .html file that contains a heading and a couple of paragraphs.

You could name this new file page2.html, and you should place it into the same folder where your first .html resides.

After you have created the new .html page, add a link to the first page so that the browser will load page2.html when you click the text "Go to page 2" in the first page.

**Exercise 5:**

HTML <a> tags can have certain attributes. The href attribute is mandatory in the <a> tag.

Modify the link that you created in the previous exercise so that a tool tip says "This leads you to another page." when the mouse cursor is over the link. Hint: use the title attribute.

**Exercise 6:**

It is possible to use a picture (image) as a link. Modify your page so that the picture that is on your first page will also serve as a link that leads to your second page.

**Exercise 7:**

Now try and create a basic CV using the examples provided on Moodle (week 1)
